

Protective ProClassicSM UL

A Flexible Premium Universal Life Insurance Policy

Facts At A Glance

Policy Features

Death Benefit Coverage	The Protective ProClassicSM UL provides a defined benefit payable upon your death. This death benefit may help protect, enhance and transfer wealth to your loved ones. The death benefit amount may be adjusted, within the plan limits, without having to buy a new, separate policy. This can reduce costs and simplify the process of changing your coverage.
Non-Taxable Death Benefit Proceeds	Death benefit proceeds are generally free from income tax, making it possible to ultimately provide more net after-tax proceeds to your beneficiaries.*
Proceeds Direct to Beneficiaries	You can designate that death benefit proceeds be paid directly to your beneficiaries, making it possible to avoid probate delays. Most states have enacted laws that make life insurance safe from creditors.
Lapse Protection	Ensures your policy will remain in force for a specified period of time regardless of policy value, provided premium requirements (<i>net of loans and withdrawals</i>) are met. Ranges between 10 and 15 years, and may vary by the insured's gender, underwriting class and issue age. Payment of the premium required to maintain the Lapse Protection does not guarantee that the policy will remain in force after the end of the Lapse Protection Period. Additional premium payments may be required after the Lapse Protection Period ends. Loans and withdrawals may cause the loss of Lapse Protection.
Premium Flexibility	Premium payments can be increased, decreased, or even skipped, depending on such factors as the amount of premium you have paid into the policy, the policy value, any loans or withdrawals, and the current interest rate.
Tax-Deferred Growth	A portion of each premium payment goes into the "policy value" which is the part of the policy that earns interest. Any interest earned is on a tax-deferred basis.*
Interest Rates	The current interest rate credited to your policy value may change at any time. While the overall economic environment influences interest rates, they are not indexed to any national standard and are subject to change at the discretion of Protective Life. We will advise you of any interest rate changes from the previous year in your policy's Annual Report.
Terminal Illness / Accelerated Death Benefit	A portion of the death benefit can be accessed if the insured has a qualifying terminal illness and meets certain terms and conditions within this benefit. While there is no cost or premium charge for this benefit, the death benefit will be reduced by the amount of benefit paid plus accumulated interest. The maximum accelerated death benefit is the lesser of 60% of the current face amount or \$1,000,000. A lien equal to the accelerated death benefit will be established against the policy and will accumulate interest. Not available in all states. State variations may apply. Please review the endorsement for complete terms, conditions, and limitations.

Access to Policy Values

Withdrawals	Withdrawals are available after the first policy year. Each withdrawal is subject to a withdrawal charge of \$25, and may reduce the face amount. If the face amount is reduced through a withdrawal, a partial surrender charge will also apply. Withdrawals that reduce the face amount below the minimum face amount will not be permitted. A withdrawal will reduce the total "paid premium amount" used to determine the minimum monthly premium required for the Lapse Protection Period.
Loan Details	A loan interest rate charge of 5% is available in years 1 through 10 of the policy. In policy years 11 and thereafter, the interest rate on policy loans is reduced to 3%.
